

Resolution from the Special Meeting of Council

Tuesday, 13 September

1. Council wishes to express the view that any move towards the introduction and use of vein scanner or similar technology in Council's rostering arrangements, would be a significant departure from current practices and therefore warrants significant discussion with key stakeholders including staff, the relevant union and Councillors.
2. That Council resolves that no vein scanner or similar technology can be implemented at the City of Monash in relation to rostering other than by an express resolution of the Council.
