MONASH SENSORY SCIENCE EXHIBITION - AUTOIMMUNITY

We would like to cordially invite members of the blind, low vision and diverse needs communities to the Monash Sensory Science Exhibition.

Learn about Autoimmunity and participate in our interactive breakout sessions.

DISCOVER THE SCIENCE OF AUTOIMMUNITY FROM LEADING SCIENTISTS THROUGH ACCESSIBLE MULTI-SENSORY, MULTI-MODAL ARTWORKS, EXHIBITS AND DISPLAYS

From handcrafted immune cells made of clay, food, paper, fabrics to technologies and interactive displays exploring autoimmune processes, you will learn about the ways in which the body mistakenly attacks its own organs and tissues, resulting in autoimmune diseases such as rheumatoid arthritis, lupus, multiple sclerosis and celiac disease.

Prepare for an enhanced experience with interactive multi-sensory science books and captivating autoimmunity data sonifications where data is turned into a musical language.
