

Tree Removals

The table below lists the details of the trees to be removed, including tree location, tree species and condition assessment. For further location details, please refer to the street map outlining all removals, replacements and infill planting, or alternatively each tree has had a reference tag attached, these tags will correspond to the reference number below for on-site identification.

Ref No.	Street Address	Assessment Outcome	Follow Up Action	Current Tree Species	Tree Condition Assessment (*ULE <2 Years)	Tree Image
1	31 Yertchuk Avenue	Tree to be removed	Replacement tree to be planted	<i>Callistemon sp.</i>	Significant old decay in major leader and trunk. Remedial work would not leave a viable tree.	
2	25 Yertchuk Avenue	Tree to be removed	No replacement tree to be planted	<i>Callistemon sp.</i>	<70% vigour	
3	21 Yertchuk Avenue	Tree to be removed	Replacement tree to be planted	<i>Callistemon sp.</i>	Vigour <70%, some dieback	

Infill Planting Location

The table below lists the details of the locations where trees will be planted in currently vacant sites along Yertchuk Avenue, Ashwood. For further location details, please refer to the street map outlining all removals, replacements and infill planting.

No.	Street Address	Assessment Outcome	Follow Up Action
1	38 Yertchuk Avenue	Vacant Site	New tree to be planted
2	34 Yertchuk Avenue	Vacant Site	New tree to be planted
3	30 Yertchuk Avenue	Vacant Site	New tree to be planted
4	38 Yertchuk Avenue	Vacant Site	New tree to be planted
5	1/23 Yertchuk Avenue	Vacant Site	New tree to be planted

Street Overview

The map below details the removals, replacements and infill plantings. All other trees have been assessed as having more than 2 years useful life and will be retained.

Street Overview Legend

-  Tree to be Removed and Replaced
-  New Tree
-  Tree Removed with No Replacement

Proposed Tree Species Options

Council's Street Tree Strategy team has created three (3) options to choose from using the most appropriate species for the location.

Option 1 – Single species (both sides of the road)

Eucalyptus leucoxylon 'Eukie Dwarf' (Dwarf Yellow Gum)

This shapely dwarf Eucalypt has a light, open canopy with a single trunk and smooth bark that sheds. Its grey-green leaves once mature, are offset by masses of nectar rich, pink, red and sometimes cream blossoms from late autumn to early summer, attracting native birds to the garden.

Mature Size

Height x Width (m): 6 – 8 x 4 – 6 m

Form: Round

Option 2 – Single species (both sides of the road)

Melia azedarach 'Elite' (White Cedar)

This tree is fast growing and has showy lilac coloured flowers in summer. It has attractive green bipinnate leaves and yellow bead-like fruits which last long after the leaves have fallen.

Mature Size

Height x Width (m): 6 – 12 x 5 – 8 m

Form: Broad Domed

Option 3 – Single species (both sides of the road)

Cercis canadensis 'Forest Pansy' (Forest Pansy Redbud)

This small, attractive tree has spectacular heart-shaped, burgundy-coloured leaves that continually change colour throughout the year. A rich purple in spring, the foliage transforms to green over summer, followed by a multi-coloured autumn display in tones of red, apricot and gold. The branches have a distinctive, smooth, dark brown wood which contrasts well with the blossom like pink flowers that are born before the re-emergence of leaves in spring.

Mature Size

Height x Width (m): 5 – 7 x 5 – 7 m

Form: V Shape
