Proposed Tree Species Options

Council's Street Tree Strategy team has created three (3) options to choose from using the most appropriate species for the location.

Option 1 – Combination of species planted in an alternating pattern on both sides of the road

Callistemon viminalis (Weeping Bottle Brush)

This is a pretty bird-attracting tree with a heavy crown due to the profusion of brilliant red flowers in Spring and Summer. It is the weight of these flowers that gives it a pendulous habit.

Mature Size

Height x Width (m): 6-8m x 6-8m

Form: Round

Acer platanoides 'Crimson Sentry' (Crimson Sentry Norway Maple)

This is a flashy crimson foliated maple with dense upright branching. It has a compact growth habit with its large crimson leaves in summer turning to gold and orange in autumn. Adds great colour contrast foliage. A small tree with greyish-black bark that is lightly textured.

Mature Size

Height x Width (m): 7 x 4 m

Form: Upright

Option 2 – Combination of species

Powerline side of road

Tristaniopsis laurina (Luscious Kanooka)

An Australian native. Leaves are dark green, shiny and large. New growth starts in a distinctive copper colour and further interest appears over time with the branches developing deep purple coloured bark which peels back to reveal a smooth, cream trunk. Flowers are yellow and sweetly perfumed, appearing in clusters through summer.

Mature Size

Height x Width (m): 8 x 4 m

Form: Oval

Non-powerline side of road

Lophostemon confertus (Queensland Brush Box)

This is a fast growing tree. Dome-like in shape, it develops a very dense foliage cover of dark green, leathery leaves providing good shade for the summer months. Summer also brings clusters of small white flowers whose stamens give them a decorative fluffy appearance.

Mature Size

Height x Width (m): 10 x 15 m

Form: Oval
